

**Extreme****PORTABLES**

When we started modifying extractors to expand our line, we soon noticed that just any shell wouldn't do. Our bodies are made special to our specifications with design attributes that come from our 20+ years experience. Portable extractors fill a need that truckmounted cleaners can't always fill. Pumps, suction, options, reliability. You can't ask for more. So when someone asks if you can clean their 10th story condo, the answer is yes!
